

## MaxCell – With Respect to Our Earth

Sustainability is the core of our corporate culture. Everything we do is driven by a commitment to preserving and protecting the Earth's natural resources and the health of its inhabitants. Since 1990, we have reduced our environmental footprint by 48%.

Milliken & Company, including MaxCell, has developed a comprehensive approach to sustainability:

- Greenhouse Gas Reduction
- Air & Water Quality
- Waste Management
- Energy & Water Reduction
- Safety & Education
- Community Involvement

Specific achievements include:

- Carbon Negative
- 0% Chlorinated solvents – replaced with organic alternatives
- 99.9% recycled waste stream – zero waste goal
- 50% reduction in water usage
- Certified Cleaner & Greener<sup>SM</sup> manufacturer

In addition, MaxCell provides the following environmental advantages:

- 1/12<sup>th</sup> the weight of standard innerduct – less raw materials used/less scrap throughout the manufacturing process
- 1/9<sup>th</sup> the volume of standard innerduct – reduced footprint means reduced fuel usage in shipping and handling at the project site

With respect to our Earth our pursuit is ongoing, because pursuit recognizes activity.
